## Probability and Two-Way Tables

**Learning Objective:** Use two-way tables to calculate theoretical probabilities.

100 students visited a youth club over three days.

The two-way table shows the information about these students.

	Monday	Wednesday	Friday	Total
Boys			16	43
Girls	21			
Total	34	30		100

### Probability & Two-Way Tables

The two-way table shows the subjects students like most.

	Female	Male	Total
English	12	18	30
Maths	28	27	55
Science	19	16	35
Total	59	61	120

PK likes maths most = 19/100 = 19%

PK likes science most = 19/120 = 15.8%

PK male like English most = 18/61 = 29.5%

PK female who likes maths is female = 12/59 = 20.3%

- Complete the two-way table.
- One of these students is chosen at random. Write down the probability that the student is a girl who visited on Wednesday.
- A boy is chosen at random. Write the probability that the student is a boy who did not visit on Friday.

		Commercial Viewed			
		Version 1	Version 2	Version 3	Total
Opinion	Likely to buy	25	20	54	99
	Unsure or unlikely to buy	40	10	31	81
	Total	65	30	85	180

Handwritten calculations in red:

- 25 + 20 + 54 = 99
- 40 + 10 + 31 = 81
- 25 + 40 = 65
- 20 + 10 = 30
- 54 + 31 = 85
- 99 + 81 = 180 AND 65 + 30 + 85 = 180

	Sport Only (No Car)	Sport Car	Totals
male	21	39	60
female	115	45	160
Totals	136	84	220

### Probability

Look at the spinner in the bag.

● The head of a coin is **heads**. Mark in the grid how the bag.

● The head of a coin is **tails**. Mark in the grid how the bag.

---

Look at the table.

Mode of transport	Head	Tails
Head	10	2
Tails	2	1

Which head of a coin is the best mode to be picked? \_\_\_\_\_

Which head of a coin is the worst mode to be picked? \_\_\_\_\_

---

Look at the chart.

Mode of transport	Head	Tails
Head	10	2
Tails	2	1

Which color of a coin is the best mode to be picked? \_\_\_\_\_

Which color of a coin is the worst mode to be picked? \_\_\_\_\_

Which color of a coin is the best mode to be picked if it is a green coin? \_\_\_\_\_

What is a two way table in probability. Probability two-way table worksheet with answers pdf. Two way table probability worksheet with answers. Two way frequency table conditional probability worksheet. Two way table probability worksheet pdf. Conditional probability two-way table worksheet with answers pdf.

In fact, 3 facts must be made after 3 child has learned the two, five, ten and squares (2 x 2, 3 x 3, 4 x 4, ...) hours. You can also find A 10000puseful to show count patterns by two. A large collection of PiršAmides NumšA© rich worksheets and Product and Sum that can be used to stretch and challenge all students. For example, I will say 4 and the child will say 8, I will say 2 and the child will say 4, for each number I say, the child must supply the product by multiplying my number by two. D. A collection of immersive math resources for key skills in KS3 and KS4 revision. 2 times Sheet 1 tables of 5. b) How likely is it that a student randomly chooses the selected gene? A sequence must be followed by having children confirm the facts in 3. However, when skipping the count, do not always start at 2, use a variety of entry points to skip the count. 2 Hour Tables Sheet 2 of 5. Ignored count refers to 2, 4, 6, 8, 10, 12, etc. These destination worksheets change it a little to provide a different experience from traditional horizontal or vertical worksheets. Learning the facts of multiplication can be frightening for children and sometimes helps to change the process. The results appear below. below.

04/10/2021 - Sometimes you will be given the intersection of two events and the probability of event A but not the probability of event B given event A. This probably sounds a bit confusing.
